DEMONSTRATED COMPETENCIES

Functional Evaluation:

- Experienced using standardized, evidenced based functional testing equipment
- Able to use job demand task analysis to develop meaningful and specific work simulation work circuits to incorporate in functional testing
- Able to interpret functional test measures and forecast return to work capacity
- Able to identify functional need for temporary task modifications or permanent accommodations during return to work planning
- WorkSafeBC Functional Capacity Evaluation Contractor

Return-To-Work Planning and Implementation:

- Able to coordinate and lead return to work meetings with involved stakeholders
- Able to effectively communicate with stakeholders to identify return to work plans, identify accountabilities of parties within the plan, develop consensus to execute the plan, and to address issues while monitoring the plan
- Able to identify and measure job demands
- Able to use task analysis and functional analysis to develop a return to work plan and grade exposure rates to work tasks within the plan specific to injured workers' needs
- Able to perform ergonomic analyses to identify risk factors of work demands in relation to functional capacities of an injured worker
- Able to identify temporary/permanent task modifications and/or accommodations necessary for an injured worker and implement them or eventually remove them in the return to work plan
- Able to prescribe ergonomic solutions via equipment provision, worker practice modifications (job coaching), or environmental changes
- Able to effectively write reports outlining specifics of job demands and return to work plans
- WorkSafeBC Return to Work Support Services Contractor
- Certified CPR and First Aid Training
