- Administering medical-legal work/functional capacity evaluation, cognitive functional capacity evaluation and cost of future care analysis
- Performing medical-legal critique and providing consultation
- Performing ergonomic risk factor and job demands analysis, including as an expert for Workers’ Compensation Appeal Tribunal purposes
- Designing and coordinating graduated return-to-work programs
- Providing job coaching and ergonomic risk factors education

Work Ability Centre, Vancouver Coastal Health: 2000 to 2007

Occupational Therapist

- Case managing and providing occupational therapy treatment within a multi-disciplinary occupational rehabilitation program for individuals who experience chronic pain
- Performing work/functional capacity evaluations (WorkSafe BC, Disability Insurers)

- Designing & coordinating in-clinic treatment & graduated return-to-work programs
- Performing ergonomic risk factor & job demands analysis at worksites
- Providing job coaching & ergonomic education in-clinic and at worksites

DEMONSTRATED COMPETENCIES

Functional Capacity Evaluations:

- Accepted as an expert witness in the Supreme Court of British Columbia for testimony related to work/functional capacity evaluation, cost of future care analysis, and occupational therapy
- Able to perform both physically-based & cognitively-based functional capacity evaluation whilst considering the physical, cognitive, & emotional factors that influence function
- Experienced using standardized, evidenced-based functional testing equipment
- Able to use job demands & task analysis to develop meaningful & specific work simulation activities to incorporate in functional testing
- Able to interpret functional test measures & determine capacity for working & performing homemaking activities & other activities of daily living
- Able to identify temporary & permanent accommodations that may be required to support safe & dependable work

Cost of Future Care / Life Care Planning Evaluation:

- Able to use task analysis to evaluate an individual's capacity for performing a variety of homemaking activities, including house cleaning & yard work
- Able to interpret functional test measures & determine capacity for homemaking
- Able to identify need for temporary or permanent accommodations within the home with an aim of restoring independent function, whenever possible, or alternatively providing recommendations, including services, supplies & equipment, to restore the level of independent function that was present prior to the onset of impairment/disability
- Experienced using standardized, evidenced based functional testing equipment within the home environment

Return-To-Work Support Services:

- Able to coordinate & lead return to work meetings with involved stakeholders
- Able to effectively communicate with stakeholders to identify return to work plans, identify accountabilities of parties within the plan, develop consensus to execute the plan, & to address issues while monitoring the plan
- Able to identify & measure job demands, physically, cognitively & psychosocially
- Able to use job demands analysis to develop return to work plans & graduate exposures to work tasks accounting for workers' abilities & workplace factors
- Able to perform ergonomic analyses to identify workplace risk factors & barriers in relation to functional capacities of an injured worker

- Able to prescribe ergonomic solutions via equipment provision, work practice modifications (“job coaching”), and/or environmental changes
- Able to effectively write reports outlining specifics of job demands & return to work plans & recommendations
